

Pre-Diabetes: The last chance to reverse Type 2 diabetes!

- * Fasting blood glucose (FBG) between 100 and 125 mg/dL.
- * Postprandial blood glucose (PBG) between 140 and 199 mg/dL.
- * Glycated hemoglobin (HbA1c or A1c) between 5.7% and 6.4%.

**NO NEEDLE,
NO PAIN,
NO BLOOD,
NO INFECTION,
NO TEST STRIPS,
HUGE SAVINGS !**

MS-99 AI Meter

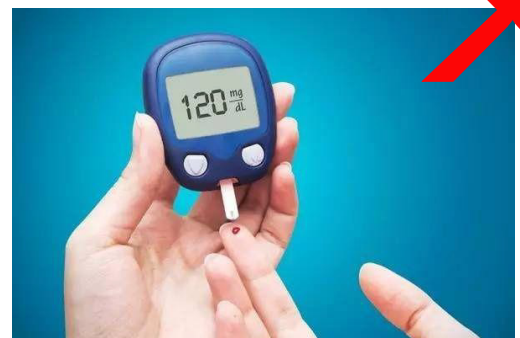

Ideal for family health care

- Utilizes patented AI algorithm technology to measure blood glucose.
- Holds patents in multiple regions including Taiwan, Japan, US, UK, and CN.
- Does not require finger sticks or test strips, making it a true non-invasive blood glucose meter.
- Combines electronic engineering and biomedical engineering to create a revolutionary product.
- Capable of testing for three different body modes related to diabetes: Normal, Pre-Diabetes, and Type 2 Diabetes.

Features:

- * Put the thumb pulp and forefinger pulp of the right and left hands on the four sensors within a 9-second reaction time.
- * Easy operation (just turn on the power, select the user mode then touch the test points).
- * Easy carry (no clean kits, no blood collection pen, no alcohol or cotton required).
- * Easy maintain (no need to change the needle, no need to clean the test parts).
- * No limitation of place and time, user can check blood glucose level as they wish.
- * No fear of lancing, a painless examination every day.
- * No worry about false result from expired test strips.
- * No tedious and complicated cleaning steps.
- * No expensive test strips.
- * Memory capacity of 1,000 sets the test result.
- * Power source: 2 "AAA" batteries.
- * Size: 86 * 90 * 24 (mm).
- * Weight: 111 grams.
- * Made in Taiwan.
